KEY FEATURES

- 20 Amp 120/277 VAC SPDT Relay
- Available with either 24 VAC/DC/120 VAC Coil or 24 VAC/DC/208-277 VAC Coil
- LED status indicator
- N/O isolated contacts
- UL and cUL listed

OVERVIEW

Hubbell Building Automation’s Enclosed 20 Amp SPDT UL 924 Bypass Relays from Functional Devices, Inc. provide an isolated N.C. contact that can be used to provide bypass shunt to power emergency egress lighting directly from the emergency generator source. The coil in these relays is powered by a normal power supply. When the loss of commercial power occurs the contact returns to its Normally Closed state and bypasses controls to the emergency egress lighting. These fixtures will remain connected directly to generator emergency source until transfer back to normal power occurs. An externally-visible LED indicates the generator power source status of the contacts.

WIRING DIAGRAMS

UL924 RELAY OPERATION:

When normal power is applied to the relay coil, the contacts are held in the open position. Upon loss of normal power, the UL924 relay shunts mechanically closed to supply emergency power to the lighting load.
